VIDEO ON RESEARCH IN LEARNING AND EDUCATION
5 ECTS

VIDEO IN RESEARCH ON LEARNING AND EDUCATION

5 ECTS

AUGUST 9 TO 25

The Video in Research on Learning and Education course will be organized for the third time in 2011 following the excellent student feedback received from the previous courses. The Video Research course is designed for students and researchers interested in using video-based methods and technologies in research on learning and education. The course focuses on current trends and phenomena in video research. The curriculum consists of the practicalities of conducting video research in diverse settings, the theoretical background and ethical issues of video research as well as video analysis tools and methods. This is an excellent opportunity for students and researchers to network while developing their understanding about the possibilities and challenges of video research. Participants are also encouraged to share their experiences of video research tools and tell about their own video research projects.

The course is aimed at master's level and postgraduate (PhD) students who use – or plan to use – video-based methods and technologies for inquiries in educational research or in related settings. The course leaders will also consider applicants who are in their final stages of undergraduate studies and are familiar with video research. The course is multidisciplinary by nature, but as the emphasis is on behavioural sciences research, applicants should have at least some foundation studies in this field.

Themes of the course

1. Theoretical perspectives on video research on learning
2. Video research on classrooms
3. Video research on teacher learning
4. Video research on peer, family, and informal learning
5. Video collaboratories and technological features
6. Various video research tools

Course leaders:

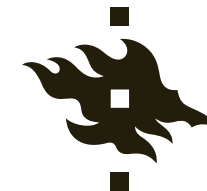

Adjunct Professor Fritjof Sahlström
University of Helsinki
Adjunct Professor Auli Toom
University of Helsinki

Course lecturers include video research experts from Finnish and international universities. The course is organised by CICERO Learning Network and is held at University of Helsinki.

CICERO Learning Network:

CICERO Learning (www.cicero.fi) is a cross-disciplinary initiative for the collaborative efforts of research on learning. CICERO Learning is a network of high-standard research groups from the research-intensive universities in Finland. The Network was founded in 2005 and is coordinated by the University of Helsinki. CICERO Learning invites accomplished researchers in Europe and globally to join

the research co-operation. Conducting cutting edge research on learning, CICERO Learning aims to create academic innovations and synergies between the research community and industry.
